NEWS FROM COUNCIL BLUFFS

Judge Woolson Anxious to Have a Verdict Returned in an Old Case.

HE GAVE THE JURY FAIR WARNING

Grant Against the Union Pacific Has Been Tried Five Times and Now a Decision Must Be Reached-Locked Up Till Tuesday.

Judge Woolson, at the morning session of federal court yesterday, showed his anxiety to secure a verdict, if such a thing were possible, in the \$20,000 damage suit of John Grant against the Union Pacific railway.

He allowed the jurymen to separate under strict instructions Thursday night, in spite of the fact that the case was then in their hands, and that such a thing was almost without precedent.

Yesterday morning the jurymen reassembled in the court room, where the attorneys addressed them for a short time on the subject of a law point that seemed to trouble them considerably.

The court then told them that this was the fifth time a jury had tried to render a verdict in the case, and every time before the attorney had been a failure.

He was very anxious that a verdict be rendered this time without any fail. He would be in the city until evening and hoped to hear that they had agreed before he left. If, however, they failed to agree before he left he would instruct the jury to make them as comfortable as possible until next Tuesday, when he would return.

The jurymen looked somewhat blank at this interesting information, but succumbed to the inevitable and filed out of the room to see what they could do toward arriving at an agreement.

Judge Woolson then adjourned court until Tuesday, when John Grant will be tried for counterfeiting and Mrs. Alice Francis for sending a false letter through the mails.

The jury failed to agree upon a verdict the judge left bright and the prospect is now extremely bright for the jurymen undergoing an interesting and somewhat tedious feature of which there is no end and water about it.

A THOUSAND DOLLAR BOND.

Going Back to First Principles in Co-Operative Insurance.

"The world moves" and "there is nothing new under the sun" are trite and trite old sayings, and the plan of the Perpetual Maturity Bonding association of Council Bluffs, is an organization that is not very old, only having filed its articles of incorporation in the fore part of the winter and writing its first bond about the middle of February, but there has been no organization of brains and capital in the history of modern enterprise that has attracted greater or more widespread attention than it has.

It is a simple proposition to permit any man, woman or child who can afford to deposit \$1.25 per month to become a bondholder.

There is something alluring in the proposition itself that invites investigation, and the investigation invites confidence.

The headquarters of the company is located in the splendid Meridian block in this city, where its offices occupy a suite of large airy rooms, and put in double the ordinary number of office hours replying to the thousands of inquiries that pour in from every state in the Union.

This universal interest in the best indication that the plan of the company has something more substantial to recommend it than novelty, and that the thousands who are seeking information are accepting the invitation of the company to invest their money in the methods and plans of investing, making and saving money.

The plan of the company as outlined by the officers and in its literature is designed as a savings and investment company, consisting upon the principles underlying insurance and kindred organizations, and have become so universally recognized throughout the business world, but is operated upon an entirely new and novel plan by which it is claimed that its investors may realize all the benefits and advantages of other plans of investing, making and saving money.

son can read the literature or bonds of the P. M. B. Co. without fully grasping all its terms and obligations. The only obligation, in fact, of the investor is the payments on the bond, and upon compliance therewith there are no provisions to defeat the bond.

The security of an investment in the company is all that could be desired, the capital stock which is fully paid in, being the largest amount of money in the company's hands at any time.

No large sums of money can be accumulated, as each \$1,000, when accumulated from all the savings of profit of the company in the trust fund, is immediately paid out to the holders of the next bond to mature upon the plan above referred to.

The company is so constructed also, that the interest of the bondholders and incorporators becomes identified with the company, and becomes profitable to the latter only upon a large and increasing business, which is also the supreme interest of the investor, each of whom becomes a personal worker in securing to the company the fact that the case was then in their hands, and that such a thing was almost without precedent.

Plans for the Depot. The plans for the new depot, which the Chicago, Burlington and Quincy Railway company proposes to erect in this city, arrived yesterday morning, accompanied by W. T. Breckinridge, the company's engineer, and W. T. Krauss, architect, of Chicago. They were taken to the company's offices, where the local contractors were invited to call and inspect them, with a view to bidding for the work. The specifications call for a building, the cost of which will be between \$20,000 and \$25,000. The foundation will be of stone and the upper part of brick. The dimensions are 100x20 and 25 feet in height, the main room being 13 feet 6 inches high. The depot will be provided with the usual facilities for carrying on the work of the company and for the accommodation of the public. The architect states that the work will in all probability be commenced about the first of next month, and he is pushed to completion with all possible speed. The building will occupy nearly the same ground as that where the present depot stands. The ground about the depot area to be filled in addition.

Conference with Colonel Cochran. M. E. Rohrer and L. A. Casper returned yesterday from Little Sioux, where they went to have a conference with Colonel A. Cochran with reference to the park which he proposes to donate to the city north of Broadway. As heretofore stated, it was found that Colonel Cochran did not own the land which he had offered to give, and an investigation showed that he had made a mistake in the number of the block. He thereupon made another proposition and delivered it to Casper. It will be opened at a meeting of the committee, which is held in the city north of Broadway, and will be presented to the city on condition that a certain amount be expended in improvements. The amount named was not far from \$2,500.

Escaped by a Window. A man who works for J. B. Long went to sleep in the opera house Thursday night shortly before the close of the entertainment, and did not wake up until a check in the morning. He woke then to find himself hugging an iron post, with considerably more vigor than the attractiveness of the post warranted. For some moments he had not the slightest idea where he was, but he finally came to himself and remembered that the last time he had known anything about it he was in the balcony of the opera house enjoying the play. He hunted around for a window, let himself carefully down the outside of the building and finally threw himself overboard, not being able to tell in the pitchy darkness whether he was going to and on the ground or in the face of creek sewer. He was somewhat relieved to find that he had only two inches to fall and that the terms of his journey through mid-air was on terra firma.

CHILDREN WHO SUFFER from scrofulous, skin or scalp diseases, are given Dr. Pierce's Golden Medical Discovery, for purifying the blood, and restoring the system. For children who are puny, pale or weak, this is a tonic which builds up both flesh and strength. What is said of it for children applies equally to adults. It is an appetizing, restorative tonic, it sets at work all the processes of digestion and nutrition, forces every organ into healthy action, and brings forth health and strength. In recovering from "grippe," or in convalescence from pneumonia, fevers, and other wasting diseases, it surely invigorates and builds up the whole system.
